EXPERIENCE

BUZZ & BEYOND (vling)

Jan 2026 - Present

DevOps Engineer Intern / Infra · Platform · AX

Seoul, South Korea

- Built a secure GitOps CI/CD workflow by deploying Atlantis on Kubernetes via a Helm chart, enforcing PR-based infrastructure changes with code-review approval and achieving a 100% audit trail for all Terraform operations
- Designed an AWS AssumeRole architecture to enforce least-privilege access at deploy time, revoking 100% of developers' local AWS access keys and eliminating credential-theft risk
- Built an LLM task-classification system on Gemini 2.5 Flash that reached 91.7% accuracy across 500+ daily tasks (13 work types, 14 meeting types), eliminating manual triage and enabling per-member workload tracking
- Built Notion custom agents and a DORA Metrics auto-calculation dashboard
- Built deployment-quality auto-review and internal automation (AX) on Notion custom agents and Workers (serverless)

AWS Student Builder Group Leader at Dongguk University

Jul 2025 - Present

Member → Group Leader (May 2026 – Present)

Amazon Web Services (AWS)

- Appointed an official, AWS-certified Student Builder Group Leader to lead a university cloud-computing community, running applied-learning sessions on AWS products for students across all majors

CSDC Lab, Dongguk University

Apr 2025 - Present

Undergraduate Research Assistant / Computer Security & Distributed Computing Lab

Seoul, South Korea

- Investigate network security and load-balancing techniques for distributed systems
- NLP-based IaC Security Analyzer — Developed a semantic security analysis tool using BERT to detect Terraform anomalies and visualize IAM privilege escalation paths via NetworkX graph algorithms
- SpinKube & WASM IoT Log Processing Simulation — Validated WebAssembly infrastructure for high-throughput IoT environments using SpinKube on Kubernetes

PROJECTS

NanoGrid Plus — Hybrid FaaS Platform (SoftBank Hackathon Final)

Dec 2024

Infrastructure Lead

GitHub

- Architected a self-hosted FaaS platform on AWS EC2, achieving a 30× cold-start improvement (3s → 0.2s) via a Docker warm pool (pause/unpause) and up to 96% cost reduction through real-time auto-tuner memory analysis
- Implemented the full data plane: an SQS long-polling task queue, S3 code storage, Redis Pub/Sub result delivery, CloudWatch custom-metric auto-reporting, and MDC-based requestId logging for end-to-end traceability

Roomeya — Serverless Dormitory Matching Platform

Sep 2025 - Dec 2025

Cloud Architect

GitHub

- Designed a full serverless AWS architecture with Terraform IaC: 9 Lambda functions, Step Functions matching workflow, 4 DynamoDB tables, API Gateway HTTP API v2, Cognito OAuth 2.0, and SES email — achieving scale-to-zero with zero off-season idle cost

Deploy Land — Gamified CI/CD Platform

Sep 2025

- Designed a serverless CI/CD platform automating GitHub Push → Build → Deploy → Health Check, with gamified real-time monitoring via AWS Amplify, Discord/Slack instant notifications, and phantom deploy prevention through config validation

AWS Cloud Migration (CAPS Club)

Mar 2022 - Sep 2022

Cloud Architect

- Migrated on-premises physical-PC infrastructure to AWS (EC2, EBS, S3, RDS, Docker), achieving 24/7 service availability and removing hardware dependency

OPEN SOURCE CONTRIBUTIONS

Atlantis — PR #6186 Merged (v0.41.0)

Mar 2026

github.com/runatlantis/atlantis/pull/6186

- Fixed autoplan bug where FetchPullStatus() was never called, causing IsMergeable to always be false (Go zero value) and blocking all clean PRs when plan_requirements: [mergeable] was set

Spin Framework Python SDK — PR #124, #126, #128

Dec 2025

github.com/spinframework/spin-python-sdk

- Contributed 3 PRs and 3 Issues to improve the Python SDK for building serverless WebAssembly applications with the Spin Framework

EDUCATION

Dongguk University

Mar 2021 - Feb 2027 (Expected)

*B.S. in Computer Science Engineering, College of Engineering**Seoul, South Korea | GPA: 4.12 / 4.5*

- Dean's List (Semester Honors) — 4 times: 2021-1, 2021-2, 2022-1, 2025-1 semesters

SKILLS

(Cloud & Infra) AWS (EC2, SQS, S3, RDS, Lambda, Step Functions, IAM, WAF, ElastiCache, EventBridge, CodePipeline), GCP, Azure, Terraform, Kubernetes, Docker, Helm

(DevOps & Automation) Atlantis, Argo Workflows, Datadog, Grafana, GitOps, CI/CD, Notion

(Programming) Golang, Python, Java, SQL

(AI/ML & Security) BERT, Hugging Face, NetworkX, NLP, Gemini, WebAssembly, SpinKube

(Frameworks) Spring Boot, Apollo Federation, GraphQL, Django, FastAPI, Node.js

(Languages) Korean (Native), Japanese (Conversational)

CERTIFICATIONS

(Cloud) Google Cloud Fundamentals: Core Infrastructure | Oct 2025

(SQL) SQL Developer (SQLD) | Sep 2024

(ICT) Craftsman Information Processing (정보처리기능사) | Dec 2022

AWARDS & ACHIEVEMENTS

Dean's List, Dongguk Univ. College of Engineering — 2021 Spring (Jul 2021)

Dean's List, Dongguk Univ. College of Engineering — 2021 Fall (Jan 2022)

Dean's List, Dongguk Univ. College of Engineering — 2022 Spring (Jul 2022)

U-LINC Adventure Design Competition — Encouragement Prize — Dec 2022 · Dongguk LINC 3.0 Director

Campus Study-Facility Occupancy Analysis System — Encouragement Prize — Dec 2022 · Dongguk LINC 3.0 Director

Torch Award (횃불상) — Aug 2023 · ROK Army Information & Communication School

SoftBank Hackathon 2025 — Finalist — Nov–Dec 2024 · NanoGrid Plus

Dean's List, Dongguk Univ. College of Engineering — 2025 Spring (Jul 2025)

ACTIVITIES

CAPS (Dongguk Univ.) — Vice President & Web Admin Lead (Mar 2022 - Sep 2023)

Cloud Club 1st Gen — Member (Mar 2022 - Sep 2023)

Amazon Cloud Club at Dongguk — Member → Group Leader (Jul 2025 - Present)

MILITARY SERVICE

Republic of Korea Army | Completed mandatory military service.
